MODERN ARCHITECTURE IN TUNE WITH NATURE

.....

In the middle of a breath-taking landscape, only 40 minutes from Barcelona by car, lies the PGA Catalunya Resort, a place which makes golfers' hearts beat faster. The resort has two 18-hole courses. One of them, the Stadium course, is among the best courses in the whole of Spain, among the third-best in Central Europe and one of the top 100 in the world. There are luxury villas and apartments for sale in the immediate vicinity which reflect the Mediterranean lifestyle.

The luxury villa designed by the architects Josep Camps and Olga Felip is located in Areal La Selva and shows the wonderful harmony between modern architecture and the natural surroundings. The concept of SIFERA consists of using KLH solid timber boards as constructive elements in order to guarantee the highest possible level of comfort in the home and high, lasting value.

Wood cladding on the inside and a white design on the outside is the logical result of Mediterranean flair.
